**Comments**

Wherever possible we first determined the amount of money that should have been received by the different departments, officers and agents of the Town and then compared our findings with the records kept by the Town Treasurer and Selectmen. For example, in verifying the amount of money that should have been received from tax collections,

we made a detailed analysis of the tax blotter, thereby determining the amount turned over to the Collector for collection. Discounts given were investigated with respect to the dates on which payments were received.

The funds that should have been received from the State and County were verified by direct correspondence with the State Treasurer and County Commissioner. The receipts of other departments such as the Municipal Court and Town Clerk were verified through an audit of the records of the departments in each case.

We found satisfactory vouchers to support all disbursements.

## REPORT OF MILK INSPECTOR

---

The work of Milk Inspection has been carried on about as usual as far as general routine is concerned in visiting the producers and going over the proper technic of cooling, method of washing and sterilizing bottles and utensils used in milking and straining etc. The general health condition of the cows other than tuberculosis, as Mastitis is prevalent in some sections and if such milk is allowed to be furnished the people of Lebanon serious results would be expected as we are using raw milk. No pasteurization plant is in operation in town.

The samples of milk are taken during delivery on the street. These are placed in special iced containers and expressed to the State Laboratory of Hygiene for analysis. A report is then sent to the producer. If the Bacteria count, Butter Fat, Solids or B. Coli are not satisfactory the technic of that producer is gone over again and a sample taken the following week and so on until the milk is up to the required standard.

The number of milk producers have greatly increased this year. several from out of the State as in Norwich, Hartland, Sharon and Randolph.

We have had no outbreak of disease this year traceable to our milk supply. Some work has been done in testing the milk for pus organisms on herds showing high Bacteria Count. This is very important in that we here find the cause of Septic Sore Throat.

W. B. Mowers, Milk Inspector.
